

Producer Agreement Form for use of U.K. Semen

The Code of Federal Regulations (9 CFR), Part 98, allows for the importation of animal semen providing certain restrictions are met.

I agree to meet the following conditions that will enable the United States Department of Agriculture to determine if the distribution and use of imported semen has complied with (9 CFR), Part 98 regulations:

- 1) My VSFCP flock identification number is _____ (not required).
- 2) If not enrolled in the VSFCP, I will register my flock in the Scrapie National Database.
- 3) In addition to normal record keeping requirements under (9 CFR), Part 98, I agree to maintain permanent records that include the following information and which will be made available upon request to the USDA Veterinary Services Representative:
 - a) Official identification number and any secondary ID of the donor sire and inseminated/implanted ewe.
 - b) Official identification number and any secondary ID and sex of the first generation progeny resulting from the use of imported semen.
- 4) I agree to immediately (prior to weaning progeny from ewes) and permanently identify progeny that result from use of imported semen or eggs fertilized with imported semen.
- 5) I agree to ensure that the ewes to be inseminated have legible and/or readable official ID, this can be tattoos, electronic chips, or official ear tags.
- 6) I agree to check with my federal Scrapie Coordinator or Area Veterinarian in charge and inform them that I wish to use sheep semen from the United Kingdom and ask them if this will in any way affect my flock certification status.
- 7) I agree to not re-sell any semen purchased from Super Sire Ltd., and to only use that semen on animals I own and are maintained on my farm.
